

1. After you download and install the EZStation software, run it and you will see a login screen. The default username and password is **admin** and **123456**

2. Once you log in, you will see the Control Panel screen. From here, click on **Device Management**

3. From here, click on **Add**

4. Enter the following details into the **Device Info** box, and then click **Add**

Device Info

Adding Mode:

IP/Domain IP Segment EZDDNS

Device Name: DDS

IP/Domain: 92.27.34.13

Port: 80

Username: DeanBrown

Password: ••••••••

Buttons: Add, Add to Group..., Cancel

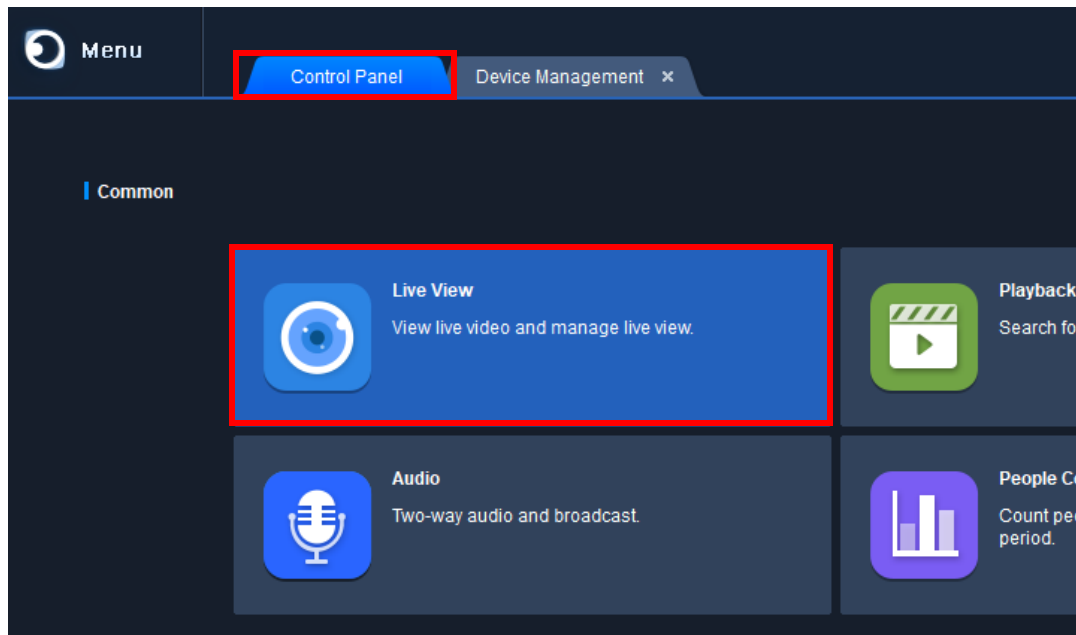

Device Name	DDS
IP/Domain	92.27.34.13
Port	80
Username	DeanBrown
Password	Demo12345

5. If this has been successfully, you will see the device and status set to **Online**

Managed Device(1) + Add Edit Delete TimeSync Status

✓	Name	IP Address	Status	Model	ev
■	DDS	92.27.34.13	Online	NVR301-08-P8	

6. Along the top, click on the **Control Panel** tab, and then on **Live View**

7. Under **NVR**, you should now see **DDS**. Click on the + button, and then double click on the **PTZ** camera. You should now see the live view of the camera.
